

Sayyid Al-Hakeem Renews Support to Empower Youth Politically and Socially

Sayyid Ammar Al-Hakeem, the head of Al-Hikma National Movement, called for the empowerment of youth both politically and socially. On the occasion of International Youth Day, His Eminence stated, "The youth phase is a stage characterized by activity, energy, contribution, and strength. They are the captains of societies' ships toward progress. Their absence, neglect, or exclusion signifies stagnation for nations, halting their growth and advancement. On this International Youth Day, we renew our commitment to supporting them politically and socially, as manifested through a series of pioneering national initiatives," H.E. added, cautioning against external schemes aiming to manipulate youth and turn them into consumable commodities driven by desires, devoid of reason or awareness. These schemes operate under misleading concepts and false pretenses of freedom."
